

ENERGY EXPORTS

Energy Exports is the dynamic division of Energy Engineered Products that exports industrial products into Africa. The business is geared to understand and assist clients in supply of pipe, tube, fittings and valves and associated products which typically are used in the following industries: Oil and Petroleum Industries • Mining • Power Generation • General Process Industries • Construction • General Engineering

Energy Exports is a specialist in assembling complete packages for shipment to any destination in Africa. Typical products include: carbon steel, high and low temperature alloys, high nickel alloys, copper alloys and stainless steels in the following forms:

PIPING AND TUBING

Pipe: seamless and welded.
Tube: for heat exchanger applications and general engineering.

FITTINGS

Fittings: butt weld, forged and threaded.

SPECIALIST FITTINGS

Specialist fittings, tubes and valves in stainless steel for mechanical instrumentation.

VALVES

Valves: both shut off and control valves being: ball, butterfly, gate, knife gate, globe, swing checks and accessories in a variety of metals and specifications.

PIPEWORK ITEMS

Associated items for pipe work such as: gaskets, nuts and bolts, lagging materials.

FLANGES

Flanges: forged and plate.

MANUFACTURERS, SPECIFICATIONS AND INSPECTION:

- Energy Exports ensures that manufacturers comply to the clients requirements and if required are approved by the respective industries. We ensure that International standards such as ASTM and ASME are adhered to and that manufacturers comply to ISO requirements.
- Energy Exports will ensure products are supplied according to the customers specifications and are backed up with the correct certification and testing procedures.
- All items are inspected to ensure compliance prior to dispatch.
- Third party inspection can be arranged.

RECENT PROJECTS HANDLED:

- Supply of heat exchanger tubes for the Pulp and Paper Industry.
- Valves for mining projects.
- Valves for use on tank containers.
- Pipe, fittings and accessories for

the Power Generation Industry.

- Specialist pipe for the Oil Industry.

GENERAL COMMERCIAL ASPECTS:

- Energy Exports has expertise in handling letters of credit and the correct preparation of documents.
- Both large and small requirements are equally important.
- Urgent items can be handled using airfreight.
- We are experts at sourcing difficult to find items.

CURRENTLY OUR CUSTOMERS OUTSIDE OF SOUTH AFRICA ARE LOCATED IN:

- Botswana
- Namibia
- Zambia
- Zimbabwe
- Ghana
- Nigeria
- Zimbabwe
- Mozambique

We are looking to supply our good services to many other parts of the African continent. Our people are dedicated to assisting clients and to ensuring a high level of efficiency and service. Our business uses the strap line of Experience, Expertise, Excellence, adequately describing the quality of what we do. We deliver what we promise, to the satisfaction of the client. Our staff have a depth of knowledge of the products, a good understanding of shipping supported by our well respected freight agents, an in house metallurgist to assist with technical aspects, and a management team of many years experience to ensure the client's needs are met.
